

About MATISEC

For more than 50 years, MATISEC has been the European leader in safety equipment for work conducted in hazardous environments.

MATISEC designs, manufactures and markets Personal Protective Equipment to protect against fatal and irreversible risks. Its offer includes a wide range of solutions, not only guaranteeing safety, but also the efficiency and seamlessness of work conducted under extreme conditions.

By placing customer attentiveness at the core of its approach, MATISEC supports industrial operators in the nuclear, chemical and military sectors, as well as firefighters, by specially designing its equipment to meet the most challenging demands.

MATISEC has 210 employees distributed across three production sites in France, Tunisia and Portugal, in addition to four maintenance agencies operating in France. Among them, 80 employees are based at its Vaulx-Milieu Head Office, in Isère. Backed by this solid rooting, the company is expanding its international presence, supported by its sole shareholder, American Group OCENCO, the global leader of emergency evacuation equipment.
